<sup>†</sup> Tremisses. Cited in Callu, Loriot 215 no. 321; probably Visigothic in the name of Libius Severus.

1709. The authenticity of this piece has been doubted (King 1987b, 291).

<sup>‡</sup> Siliquae. A reverse VOT/V, mint-mark AQP, is cited for Jovinus in *NCirc* 1924, 542; ? by Cigoi, but perhaps of Jovian, though siliquae of Aquileia are not known for him, nor is this reverse type recorded for him in silver. A VOT/V/MVLT/X 'half-siliqua' (Banduri II, 552 cites as gold), mint-mark PLMS, is attributed to Cigoi (*Br* 366); *Coh* 7 is probably a misread coin of Julian (Banduri II, 553), as *RIC*

VIII: Lyon 218 etc. A similar silver 'medallion', mint-mark AQVISE, is attributed to Cigoi (*Br* 367). A forgery of normal type has mint-mark RVPS.

<sup>§</sup> VICTOR-IA AVGG. For ancient imitations of this reverse see Honorius no. 1360.

1713. Baldwin 1991. For a Cigoi forgery, see *Br* 365.

1716. For Cigoi forgeries see *Br* 364, 369; for another false piece of this type, mint-mark uncertain, see *BoC* 4 (1979), 86.

1718, 1719. For false siliquae of Sebastian see *Wiczay* 2953; *Gerin* 95.
